Dalton

Automatic Dish Detergent

Solid

Item #400030

4-7.5 Lb

PRODUCT DESCRIPTION

WHAT I AM

Dalton is a high performance dish detergent solid in a capsule. It was specifically designed to be safely used on all metals including aluminum and other soft metals. It is formulated as a heavy duty combination of alkaline builders, water conditioners, soil suspending polyacrylates and non-foaming detergents.

PRODUCT FEATURES

- A versatile product that effectively removes dried-on foods, grease, oil and other food soils on glassware, china, plastic, cutlery, and pots and pans of all construction including aluminum, zinc and other soft metals.
- Generates no foam that can interfere with accuracy of dishwasher's operation.
- Contains a special polymer that decreases precipitation and adherence of inorganic salts to glass surfaces thereby eliminating 'spotting' of glassware.
- Performance and rinsability are unaffected by water hardness. Contains water softeners that reduce formation and build-up of scale and scum in jet sprays and other surfaces of dishwashing machines.

IDEAL FOR

Glassware, steel cutlery, pots and pans, porcelain and plastics.

OUR PROMISE

SAFER & STRONGER™

Get the best of both worlds with Cleanslate.

Our products are powerful enough to tackle your grimeiest surfaces – yet gentle enough for your health & our planet.
